Operational Hours

The National Weather Service office in Riverton, Wyoming is staffed 24 hours a day with at least one meteorologist certified to handle Fire Weather requests. Additional staff is usually available enabling multiple requests to be handled in a timely manner. The office has 2 certified Incident Meteorologists who are available for onsite support to large wildfires, prescribed fires, and other major incidents.

General Fire Weather Forecast Issuance Times (Dates may be adjusted according to user needs)

May 1 thru October 31 Daily AM Issuance by 0700 MDT and PM Issuance by 1500 MDT.

Forecast Services

Fire Weather Forecasts, site specific Spot Forecasts, Red Flag Warnings, and Fire Weather Watches will generally follow the format as defined in the **Fire Weather Products Section** of the **Northern Rockies Annual Operating Plan**. These products are issued on a routine basis through the season. Smoke Dispersion information is available in the Fire Weather Forecasts and upon request for verbal briefings or through spot requests.

Non-routine or unscheduled products may be issued at any time as weather conditions can and do change rapidly. The affected dispatch offices in the Riverton Fire Weather District will be alerted by telephone should this need occur.

Fire Weather Briefings

The National Weather Service in Riverton will offer fire weather briefings via recorded multimedia weather briefing on an event driven basis. A notification email will be sent whenever a briefing is issued from this address: cr.wxriw@noaa.gov Please take this address out of your "spam" list.

You can find the file on our web site:

Red Flag Criteria

These are Red Flag events when they occur with Very High, or Extreme Fire Dangers.

1. Widely scattered dry thunderstorms. (A lightning storm accompanied by less than 0.10 inch precipitation or less, often with very gusty winds, LAL6).
2. Increased thunderstorm activity, wet or dry, during an extremely dry period.
3. A combination of low RH's and increasing strong or gusty surface winds, or abrupt change in direction due to the approach and passage of a cold front, squall line, or other weather phenomena other than isolated thunderstorms, a Haines Index of 6.
4. Anytime the forecaster foresees a change in weather that would result in a significant increase in fire danger.

Red Flag Verification

Red Flag Warnings for Winds and RH will be considered verified when sustained winds or frequent gusts of 25 mph or higher are observed, combined with an RH of 15 percent or lower for any three hr observations within a given zone. The three observations can be from one sensor or multiple sensors, but must encompass 3 separate hours out of a consecutive 8 hour period.

Agencies Served

The Riverton National Weather Service Office serves Yellowstone National Park in the Northern Rockies Area.

Fire Weather Zones

The Riverton Fire Weather District covers Zone 140, Yellowstone National Park in extreme northwest Wyoming.
